## Opening session and keynote    Wednesday 08/30    09:00-10:30    Auditorium 250

### Opening session

- **Georgios Kouroupetroglou**, President of AAATE, National and Kapodistrian University of Athens, Greece
- **Isis Truck**, Director of CHArt Laboratory, University Paris 8-Vincennes-Saint-Denis, France
- **Gérard Uzan**, Président of IFRATH, University Paris 8-Vincennes-Saint-Denis, France
- **Dominique Archambault**, University Paris 8-Vincennes-Saint-Denis, France

### Keynote

**Tiago Guerreiro**, LASIGE – Universidade de Lisboa, Portugal

#### *Designing Inclusive Technologies that Promote Collaboration, Playfulness, and Self-Efficacy*

When we hear people talking about accessibility, it is common to observe an attempt to put a band-aid on a problem. Accessibility as an after-thought not only creates interactive systems that are not accessible from the beginning but also leads to “accessible” systems that are superficial and stereotypical, and no longer fit the purpose they were intended for. In these cases, people with disabilities tend to be presented with sub-optimal systems that limit their interactive experience. In this keynote, I will talk about our engagements with communities of people with disabilities to create interactive experiences that are playful, collaborative, and promote self-efficacy, in the contexts of inclusive learning, inclusive gaming, and human-robot interaction. This includes presenting research projects we have been working on in the last few years but also the different methodologies applied to get a deeper understanding of the communities we collaborate with, and the impact of our own interventions.

## Second plenary session    Thursday 08/31    14:00-15:00    Auditorium 250

### Keynote

**Salvatore Anzalone**, CHArt Laboratory – University Paris 8-Vincennes-Saint-Denis, France

#### *Social Artificial Agents for Neurodevelopmental Deficits*

Endowing agents with socio-cognitive skills translates mainly into two challenges: the analysis of the dynamics of social interactions between humans; the development of skills that explicitly take in account the human presence in the agent’s perception-cognition-action loop. In this presentation, I will show how a social agent can deal with people’s mental states as well with its owns. This will be achieved through the exploitation of basic socio-cognitive skills as engagement, imitation, joint attention and perspective taking, together with a fine characterization and modeling of humans’ individual differences. In the last decade, social agents were employed in the support of children with Neuro-Developmental Deficits, where social skills are impaired. In this case, social agents can assure a continuous, intensive, long-term caring of children. I will focus, in particular, on their use at school: an environment in which social agents can be used as tools to tailor teaching strategies and intensives therapies to the special needs of children.

**Final plenary session**    **Friday 09/01**    **12:30-13:30**    **Auditorium 250**

### **Round table**

*Assuring universal access to AT. The way forward and priorities for the global AT agenda*

- Introduction: **Pascal Bijleveld**, CEO ATScale
- **Kylie Shae**, Team lead “Access to Assistive Technology” (ATA), World Health Organization
- **Luc de Witte**, President Global Alliance of Assistive Technology Organizations, The Hague University of Applied Science
- **Annalu Waller**, University of Dundee and AAATE National Contact Person for the UK
- **Evert-Jan Hoogerwerf**, Secretary-General of AAATE, AIAS Bologna, Italy
- Chair: **Emma Smith**, Maynooth University

### **Closing ceremony**

- AAATE Diamond Award – announced by: **Georgios Kouroupetroglou**, President of AAATE, National and Kapodistrian University of Athens, Greece
- Best paper award – announced by: **Pedro Encarnação**, President-elect of AAATE, Universidade Católica Portuguesa, Portugal
- Closing the conference: **Dominique Archambault**, University Paris 8-Vincennes-Saint-Denis, France
